A commentary on

Novel functional roles for *PERIANTHIA* and *SEUSS* during floral organ identity specification, floral meristem termination and gynoecial development

by Wynn, A. N., Seaman, A. A., Jones, A. L., and Franks, R. G. (2014) *Front. Plant Sci.* 5:130. doi: 10.3389/fpls.2014.00130

In “Materials and Methods” under the heading “Tissue Fixing and Clearing” we incorrectly described the composition of our Hoyer’s solution. “... Hoyer’s solution

(70% ethanol, 5% gum arabic, 4% glycerol)” should read “... Hoyer’s solution (70% chloral hydrate, 5% gum arabic, 4% glycerol).”

Conflict of Interest Statement: The author declares that the research was conducted in the absence of any commercial or financial relationships that could be construed as a potential conflict of interest.
