

Table 3: Data quality problems, reasons, and solutions regarding the subjective bias.

<b>Subjective bias Problems</b>	<b>Reasons</b>	<b>Solutions</b>
Spatial bias	Exclusive recording of positive data	Include negative data/absence data (see Table 2)
	Different accessibility of sites	Adjust research question
	Different probability of animal-volunteer encounter	Adjust research question
No representative temporal, spatial and demographic samples	Low number of volunteers	See Table 1 for motivation of participants
Temporal bias	Unsuitable weather conditions	Adjust research question Address weather conditions in protocol
